Product Description

Remarkable polymers with a renewable backbone provided by nature itself.

Eastman™ CAB-381-21s a cellulose ester with high butyryl content and high ASTM(A) \ Other than a higher viscosity and molecular weight, this cellulose ester shares the same characteristics as CAB-381-0.1 and CAB-381-0.5. CAB-381-2 offers a combination of sc compatibility, moisture resistance, excellent surface hardness, and good film strength. It as a dry, free-flowing powder. Eastman™ cellulose esters are based on up to sixty perceione of the most abundant natural renewable resources.
